SUMMARY

Product Designer and Design Engineer based in Bali. Over 5 years across SaaS, operations, and Web3. Works from user research and interaction design through design systems and into production code.

EXPERIENCE

Senior UI/UX Designer, Native Productions

Apr 2024 - Present | Remote, Bali, Indonesia

- Lead product design for a SaaS platform US solar roofing contractors use to run leads, estimates, scheduling, jobs, and a customer portal, across 4 user groups: office, field crews, homeowners, and admins.
- Designed and built the mobile app front end in Flutter.
- Lead UX and UI design for a disaster recovery planning product, from discovery and research to implementation.
- Researched and designed SaaS products for clients, including a real estate underwriting tool that swaps complex spreadsheets for an AI gut check on deals.

Product Designer, Jinom

Sep 2023 - Apr 2024 | Bali, Indonesia

- Designed an ISP marketplace that turns comparing internet providers into a search-first flow based on the user's address, from research to hi-fi prototype.
- Led UX research for a new finance tool: interviewed the finance team, mapped 21 manual journal types, and turned findings into flows and a monday.com workflow.
- Built a product knowledge base for everyone who worked with the product, from resellers to internal teams and leadership.

UI/UX Designer, Airdrop Technologies

Sep 2022 - Jan 2023 | Remote, Singapore

- Designed 3 Web3 products end to end, including a tokenized real estate marketplace with separate investor and developer portals on one shared design system.
- Designed a Steam-style Web3 game store and the admin dashboard that powers it.
- Designed an NFT collectibles marketplace for desktop and mobile, and set up a Figma component library that turned days of screen work into minutes.

UI/UX Designer, Tiga Token Digital

May 2021 - Aug 2022 | Bali, Indonesia

- Designed 6+ Web3 products, including an NFT marketplace, crypto wallet extension, exchange, staking platform, and launchpad.
- Managed the end-to-end design process as the sole designer, from concept development to final interface delivery.
- Built landing pages and created supporting visual assets for product launches, events, and social content.

SKILLS

UX: User Research, Usability Testing, Heuristic Evaluation, Information Architecture, Wireframing & Prototyping

UI: Interaction Design, Design Systems & Tokens, Motion & Micro-interactions, Accessibility, Dashboard Design

AI: Context Engineering, AI Research Synthesis, Agent & MCP Tooling, Multi-model Workflows, Design-to-Code with AI, Human-in-the-loop Review
